Hey Gary,

Just an FYI...Steve Dicker, HPD, and Gary Porter, CID, stopped by to see you today. Gary said that he was part of the original warrant/search and said that he later found out that Bowman was trying to make "NaSH" so was seeking out material with high sulfides.

He was, apparently, telling people he was recycling oil when he was really trying to get the sulfides. Gary said that's probably why we are suddenly seeing a lot of H2S hits since we are getting into the material in the tanks.

Thought that was interesting.

We've had a good couple of days. Mainly focused on cleaning things up, especially the pond areas.

Thanks,

Daniel
